5.1.1 Connecting to Internet

Two common connection methods are shown below

1. Connecting via switch or router

2. To connect directly through network cable, the IP address of the computer should be changed so that it is on the same network segment as the camera

E.g.: The factory-preset default IP address of the camera is 192.168.100.100. The computer IP address must be set with the same network segment, such as 192.168.100.101, so that the computer can be connected correctly with the camera

• Change network settings

5.1.2 Using the Browser to View the Images

- Open the browser, and enter the IP address of the camera in the address bar
E.g.: <http://192.168.100.100> (default IP address)
- Enter administrator's account and password
For the first-time login, please refer to [5.2.12 Settings - User](#) to change the default password

- RTSP Streaming 3 (720P@H.264)=> <rtsp://camera IP:8556/h264>

If password authentication is enabled, the RTSP connection address is as follows:

- RTSP Streaming 1
<rtsp://Username:Password@VC IP address:port/hevc>
- RTSP Streaming 2/ 3
<rtsp://Username:Password@VC IP address:port/h264>
- To enable password authentication function, please refer to [5.2.4 Stream](#)

Example:

Open the VLC software, click [Open Network Streaming], and enter the URL:
